The figure consists of five separate tidal charts, each representing a different phase of the moon and a specific tidal event. The y-axis for all charts ranges from -0.75 to 1.00 meters (PIES). The x-axis shows time in hours (00h, 06h, 12h, 18h) for two consecutive days.

- Chart 1:** Luna Cuarto Menguante 22:58. Shows a high tide around 12h on day 1 and 18h on day 2.
- Chart 2:** Luna Nueva 21:08. Shows a low tide around 06h on day 1 and 12h on day 2.
- Chart 3:** Luna Cuarto Creciente 12:14. Shows a high tide around 00h on day 1 and 18h on day 2.
- Chart 4:** Luna Llena 11:04. Shows a low tide around 06h on day 1 and 12h on day 2.
- Chart 5:** Luna Cuarto Creciente 12:14. Shows a high tide around 00h on day 1 and 18h on day 2.

The charts illustrate the periodic nature of tides, with each cycle spanning approximately 24 hours. The labels at the bottom of each chart correspond to the days of the month: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, and 31.
